

INDEX

- aggregate
 - demand 245, 254, 258–260, 262–264
 - income 258, 260, 262
- arbitrage 3–8, 11, 14, 21, 22, 24, 72, 108, 114, 123, 125–127, 129–133, 138
- ARCH 62, 75, 96, 113
- Black-Scholes theory 3, 4, 6–11, 13, 16, 19, 20, 23, 52, 138
- capital market theory 125–127, 137, 138
- Cauchy problem 312–316, 318–325, 327, 328
- characteristic time 28, 57, 218, 220, 304
- characteristics space 295, 304, 306, 308
- chartists 113
- coalition 280–291
- Cold War 281, 286, 289, 291
- collective behavior 93, 232, 275, 276, 278, 280
- conservation of money 244, 245, 250
- corner equilibrium points (CEP) 273
 - fully diversified CEP (FDCEP) 273–277
- correlation
 - coefficient 28–33
 - cross-correlation of stocks 28–34
 - exponent 56
 - function 53–55, 57, 70, 71, 138, 216
 - matrix 28–34, 215
 - of return 27, 36, 39, 41, 51, 52, 70, 72, 75, 76, 86
 - of volatility 52, 58, 59, 61, 62, 75, 93, 95, 96, 101
 - scale invariant 150, 151, 155
 - time 51, 59
- Cournot
 - game 210, 213
 - model 213
- crisis 254–258
- crossover 40, 41, 52, 55, 57, 58
- data collapse 165, 166
- demand 8, 112, 115, 135, 141, 142, 147, 176, 191, 195, 199, 207, 210, 213, 221, 228, 242–248, 250–254, 258–265
- detrended fluctuation analysis (DFA) 36, 37, 39–42, 44, 46–48, 55–58, 60–62
- diffusion equation 313, 314, 317, 318
 - fractional 313–315, 318–328, 330
 - standard 312–314, 318–321, 328, 330
- diffusion limited aggregation (DLA) 151
- distribution
 - Gaussian 31, 60, 99, 102, 118, 145, 164, 167, 169, 171, 302, 312, 313, 315, 316, 326, 339, 341–343, 345, 347
 - heavy tail 312

- implied 10, 11, 13
- Lévy 141, 153, 240, 312, 313, 317, 324
- leptokurtic 13, 51, 110
- log-normal 11, 13, 20, 52, 60–62, 69, 134, 138, 161–163, 234, 235
- of firm size 154, 160–163, 167, 170, 171, 237
- of growth rate of firm 160–164, 168, 171
- of return 59, 67, 74, 88–90, 95, 97, 98, 102, 103, 110, 111, 118, 140, 145, 147, 148, 176, 202
- of velocity differences 93, 97, 99
- of volatility 52, 58, 61, 62
- Pareto 110, 208, 233, 312
- tent shaped 163, 170, 171
- truncated Lévy 98, 237
- 109, 111, 112, 114, 115, 129
- rate 37, 51, 73, 75–77, 86, 93, 94, 97, 111, 140
- Fisher-Eigen
 - dynamics 300, 305–307
 - equation 304
 - model 297, 299–301
- fluctuation
 - Brownian 142
 - chaotic 146, 148
 - Gaussian 209, 214, 222, 229
 - of growth rate 160, 161, 307
 - of price 2, 23, 59, 93, 140, 144, 148, 153, 198, 204, 237, 240
 - of velocity 93, 99, 100, 103
 - stochastic 141, 146, 147, 211
- fractional Brown motion 38, 44, 56, 59
- frustration 283, 288–290, 292, 296
- fundamentalists 113
- game theory 206, 207, 209, 212, 213, 226, 229
 - evolutionary 209, 211
- gauge theory 121, 123, 124, 127, 128, 131, 133, 137
- generalized replicator dynamics (GRD) 271–276, 278
- Gibrat model 161–163
- growth dynamic
 - of firm 171, 172
- growth rate
 - of firm 154, 159–162, 164, 165, 170, 172
 - of price 256
- hedging 1–3, 6, 8, 112–114
- hierarchical structure 94
- hierarchy of exponents 41
- Hurst exponent 38, 44, 45
- economic instability 242, 243
- efficient market 34, 62, 72
- energy cascade 93, 100, 101
- evolutionary
 - dynamic 295–297, 302, 304
